

Agentic Coding

CHEAT SHEET

Basics, Codex & good use cases

01 Basics

LLM - A language model that predicts likely next text pieces.

Metaphor: 🧠 Brain

Token - A piece of text: part of a word, a word, or a character string.

Metaphor: 🧩 Text building block

Chatbot - An interface for messages to an LLM and its answers.

Metaphor: 👁️ 👂 🗨️ Eyes, ears, mouth

Agent - An LLM-based system that uses tools, acts, checks, and continues.

Metaphor: 🖐️ 🦵 🦶 Hands, arms, feet

Prompting - Ask in chat; decide yourself what to do with the answer.

Metaphor: 📖 Ask for a recipe

Vibe Coding - Describe software loosely, try it, and adjust by feel.

Metaphor: 🍝 "Something pasta-ish"

Agentic Coding - Give a goal, context, files, rules, and boundaries for implementation.

Metaphor: 👨🍳 Chef in the kitchen

02 Codex

Codex - An agentic coding environment for working with project files.

Metaphor: 👨🍳 Chef cook

Project - Organizes your work inside Codex.

Metaphor: 🏠 Restaurant

Model - The selected AI brain for the task.

Metaphor: 🧠 Chef's brain

Workspace - Project folder where the agent may read and change files.

Metaphor: 🍳 Kitchen

Tool - Programs and apps the agent can use.

Metaphor: 🛠️ Kitchen tools

Plugin - A special program made for Codex.

Metaphor: 🍷 Special kitchen tool

Automation - A repeatable agent task with a configured trigger.

Metaphor: ⌚ Kitchen timer

Usage - Account area showing how much Codex you have used.

Metaphor: 💰 Salary for the cook

03 Use cases

Use Case - A concrete task where AI creates value in a workflow.

Metaphor: 🍽️ Dish on the menu

Input - Task material: a file, notes, URL, or table.

Metaphor: 🥕 Ingredients

Output - Desired result: a report, list, screenshots, or app.

Metaphor: 🍽️ Finished dish

Rule - A fixed condition the result must meet.

Metaphor: 🍴 Cooking rule

Check Criteria - How you recognize that the task is done well enough.

Metaphor: 🍷 Taste test

Error Case - Input or output is missing, wrong, or unclear.

Metaphor: ❓ Missing ingredient

Human Approval - A decision kept with a person, such as publishing or deleting data.

Metaphor: ✅ Chef signs off

04 Choose a good use case

Frequent - The task comes up regularly.

Metaphor: 🔄 Regular order

Time-consuming - It noticeably absorbs attention.

Metaphor: ⌚ Long prep time

Easy to check - A good result is recognizable.

Metaphor: 🔍 Quality check

Low-risk - Mistakes are easy to spot and correct.

Metaphor: 🛑 Safety net

Context-rich - Examples, files, and rules are available.

Metaphor: 📁 Recipe archive
